General / Cilium v1.12 Agent Metrics

2023-03-13 11:00:00 to 2023-03-14 17:00:00 UTC

pod All

Errors & Warnings

CPU Usage per node

Generic

Virtual Memory Bytes

Resident memory status

Open file descriptors

System-wide BPF memory usage

BPF map pressure

API

API call latency (average node)

API call latency (max node)

API calls (average node)

API calls (max node)

API return codes (average node)

API return codes (sum all nodes)

Cilium

BPF

system calls (average node)

system calls (max node)

system call latency (avg node)

system call latency (max node)

map ops (average node)

map ops (max node)

map ops (sum failures)

kvstore

operations (sum all nodes)

operations (max node)

latency (average node)
