About Rancher Monitoring

Rancher Monitoring is a Helm chart developed by Rancher that is powered by Prometheus Operator. It is based on the upstream kube-prometheus-stack Helm chart maintained by the Prometheus community.

By default, the chart deploys Grafana alongside a set of Grafana dashboards curated by the kube-prometheus project.

For more information on how Rancher Monitoring differs from kube-prometheus-stack, please view the CHANGELOG.md of the rancher-monitoring chart located in the rancher/charts repository.

For more information about how to configure Rancher Monitoring, please view the Rancher docs.
