About Rancher Monitoring

Rancher Monitoring is a Helm chart developed by Rancher that is powered by [Prometheus Operator](#). It is based on the upstream [kube-prometheus-stack](#) Helm chart maintained by the Prometheus community.

By default, the chart deploys Grafana alongside a set of Grafana dashboards curated by the [kube-prometheus](#) project.

For more information on how Rancher Monitoring differs from [kube-prometheus-stack](#), please view the [CHANGELOG.md](#) of the rancher-monitoring chart located in the [rancher/charts](#) repository.

For more information about how to configure Rancher Monitoring, please view the [Rancher docs](#).
